OPEN LETTER TO THE PEOPLE OF SAN DIEGO

A battle is being fought for freedom in your city, that if lost, can be looked upon as the last stand of American Liberty.

Mass medication is the issue. The placing of fluorides in the communal water supply is a criminal encroachment on your constitutional rights. It is forcing you to take a medical remedy for a common deficiency disease known as tooth decay. It is the treatment by force of a type of starvation with a poisonous drug that you never would consider acceptable as a possible contaminant of your food or drink under any sane set of circumstances.

Who is trying to force this crazy idea into practice? You probably are unaware of the fact that the same commercial interests that have for forty years been promoting the destruction and removal from bread of the very food elements that would prevent tooth decay (by their promotion of flour bleaching) are now promoting the fluoridation of water. First they create a terrible state of dental disease, by criminal food adulteration, then try to sell us a quack remedy for its prevention.

Read what our official investigating Committee in Congress says about the idea of water fluoridation, (in enclosed Delaney Committee Report). Read the rest of the story of how the flour racketeers have for forty years undermined the public health by selling a product from which the essential minerals and vitamins have been removed, and the nonessential residues fraudulently sold as "food". "Food" hardly more capable of supporting life of test animals than so much straw. "Food" that contained preservative chemicals so toxic that they caused fatal "running fits" in dogs. "Food" that specifically causes tooth decay and dissolves tooth enamel on contact, in tests on human teeth. (As reported in "The Vitamins in Medicine", Bicknell & Prescott, Page 688; 1945). (Copy on request).

Then get busy and help raise a few dollars to help your fellow townsmen fight this Rat Poison Gang, for unless you get behind this effort to defend yourself NOW it will soon be too late. The scoundrels back of this racket have actually gotten a lower court to believe that Fluoridation is NOT mass medication. If their program has any justification, how is it that they could not convince the Delaney Committee? Experimentation on any person

or medication without his consent is criminal and vicious. No sane or clear-thinking could even think of endorsing such a frightful program.

It is the essence of TOTALITARIANISM -- right here in your home town.

Very truly yours,

Royal Lee, D.D.S., President
LEE FOUNDATION FOR NUTRITIONAL RESEARCH
(A non-profit institution, dedicated to better food).
